Passionate About Helping Others.We'll Hook You Up in a Jiffy.We will go to any place in South Africa.No vehicle has too little or too much damage to tow.No distance is too far or too short to travel...HBK TOWING is a family orientated company established in 2016, but we have been in the Towing Industry for more than 10 years.We have a passion for what we do & we take Pride in how we do it!1. TOWING*Accident Related Towing*Any accident towing related situation we assist with as follow: when a client was involved in a vehicle accident we assist with the whole procedure/process and inform them with what the next steps are, we make sure of injuries and if needed contact the paramedics/ambulance closest to the accident scene, then phone the client’s family members and client’s Insurance Company for towing authorization then we tow the vehicle to that insurance’s assessment yard, insurance’s approved Auto body repair shop or the client’s choice of delivery address. This will happen after Tshwane Metro Police Department or S.A.P.D completed the accident report and the client received the AR (Accident Report) number.*Trade Tows*When a client’s vehicle brake down on the way to work or have a mechanical problem and the vehicle is NOT drive-able, we will tow the vehicle to the client’s choice of destination or to their insurance’s approved

mechanical shop for a affordable amount, or if the vehicle is still under warranty we take it then to the approved agents for specific make of vehicle to have the vehicle repaired and drive-able.2. ROADSIDE ASSISTANCEWhen a client runs out of fuel, hits a pothole and damages the tyres, mag-rims and suspension, or experience any battery problems they or their insurance company contacts us for assistance (Roadside Assistance) we give an E.T.A (estimated time of arrival) and try to assist the client as quick as possible. We then deliver fuel, help change a Tyre of jump-start the vehicle. If none can get the vehicle started we then have to tow the vehicle to the closest place / shop that can repair the vehicle that is if none of our Sub-Contractors can assist with the repairs so that the client can reach their point of destination as safe as possible.3. RECOVERY This is when a vehicle was involved in an accident and the car over turned / totalled we will assist in getting the vehicle on its wheels again so that the vehicle can be towed. We also recover vehicles that the driver lost control of and the vehicle ended up in a ditch/hole.Our ServicesVehicle Accident TowingTrade TowsRoadside AssistanceAccident Vehicle RecoveryMechanic on CallFamily Run Services
