Mediclinic Nelspruit Day Clinic, 1 Louise St, Sonheuwel  
Mbombela 1201

Phone: +27 13 745 7672

Dr Barry MH (General Practitioner) endeavors to be leaders and advocates in the pursuit of excellence in general health and obstetrics care. We strive to provide the highest quality patient care for the citizens of Nelspruit. We value integrity, honesty, and compassion as principles of all personal and professional activities. Efficiency and cost effectiveness in providing the highest quality personalized care to all our patients. We offer the highest quality service to our patients and continuously evaluate the results of our efforts by how effectively we meet the needs of our patients. Experience. 10 years at Shongwe Mission Hospital close to the Mozambique border with two years in health administration. General practice in Nelspruit since 1996. Obstetrics since 1985. This forms a major part of the clinical practice. (I am very much in favour of natural birthing, regularly do home and water birthing if requested, and work with several midwives - for whom I also provide a back-up service if they have difficulties with their own homebirths.)
