

The Nanny Movement Nelspruit/White River

Nelspruit/White River

Phone: +27 82 500 0906

We offer comprehensive nanny training workshops, born out of a deep passion for education, early childhood development, and nanny training courses. We acknowledge the importance of empowering and educating the heroes who take care of the next generation. Imagine the impact on our society if we can change the way children are taken care of in their early years. We are passionate about designing workshops with relevant information about childcare, brain development, and baby and child stimulation.

TRAINING Affordable ~ Nanny Training Workshops

At The Nanny Movement, everything we do is rooted in our love for education and early childhood development. We believe that everyone involved in a child's life-whether it's a nanny, parent, or caregiver-should be well-trained and equipped to help build a strong, healthy foundation for that child's future. Just imagine the impact we could make if every child received the right kind of care during their early years. That's the dream we're working toward. Our workshops are designed with purpose and passion. We focus on essential topics like child development, brain growth, and how to stimulate babies and young children in ways that genuinely support their learning and emotional well-being. We believe change starts here-one trained caregiver at a time.

PLACEMENT

The Nanny Movement Recruitment

At The Nanny Movement, our recruitment process is driven by a deep passion for uplifting and equipping women-helping them step into their roles with confidence and excellence. We understand that finding the right nanny, domestic worker, caregiver, au pair, or preschool assistant can be a daunting task. For many families and schools, it's an emotional and important decision, and that's where we step in. With years of experience and a heart for people, we specialize in carefully

matching trained and compassionate individuals with families and institutions who need them most. Whether it's in the home or the classroom, our goal is to place professionals who will exceed expectations and make a lasting difference. Let us help you find the perfect fit-someone you can trust, someone who cares.

OUR MISSIONThe Nanny Movement's mission is to support, inspire and empower nannies, caregivers, teacher assistants, and anyone looking to work with children in the early years. We also make use of other professionals to enable us to provide in-depth and thorough training in all aspects regarding childcare in both home-based and centre-based facilities. The goal of Early Childhood Development (ECD) programmes is to improve the young child's capacity to develop and learn. The Nanny Movement's courses aim to assist in training your child's caregiver on how to assist effectively in exactly that.
