BRANDING OPTIONSEmbroidery Embroidery is a high-quality method of branding, that leaves a classy feel and finish to your products. ... One of these is the use of the branded clothing as a merchandise or gift option. Handing out high quality branded t-shirts at events is a great way of increasing brand awareness with potential clients. Screen Printing The process is centred on embellishing a garment. It requires a screen with the design on which allows you to put ink on to print the logo or design on a specific garment. Types of items this is used for are putting designs on shirts, bags, sporting team numbers on shirts, bag logo etc. Polyflex The process is centred on

embellishing a garment. It requires a vinyl cutter which allows you to cut out a logo or design from a specific sheet which is then pressed through usual heat transfer means. Types of items this is used for are sporting team numbers on shirts, bag logo etc.

Sublimation Printing Sublimation printing is a popular method of printing which aims at transferring a design from sublimation paper onto a piece of fabric or material by using pressure and heat (between 350 - 400 degrees) Can be used to brand sports teams shirts etc.

Laser Engraving Laser engraving is a process that vaporizes materials into fumes to engrave permanent, deep marks. This method is used to brand diaries, books, corporate gifts and writing instruments. The engraving is long lasting and very elegant.

Embossing & Debossing Many people consider debossing to be the opposite of embossing, but both produce a similar effect. Embossing involves having the design raised on the surface of the product whereas debossing involves pressing the design down into the product.
